

Laboratorio: Explorar Azure Storage (DP-900)

Este documento contiene las capturas de pantalla que evidencian la realización de los pasos del laboratorio oficial de Microsoft Azure Data Fundamentals sobre Azure Storage.

Paso 1: Explorar Azure Blob Storage

Capturas demostrando la creación de un contenedor y la subida de un archivo blob.

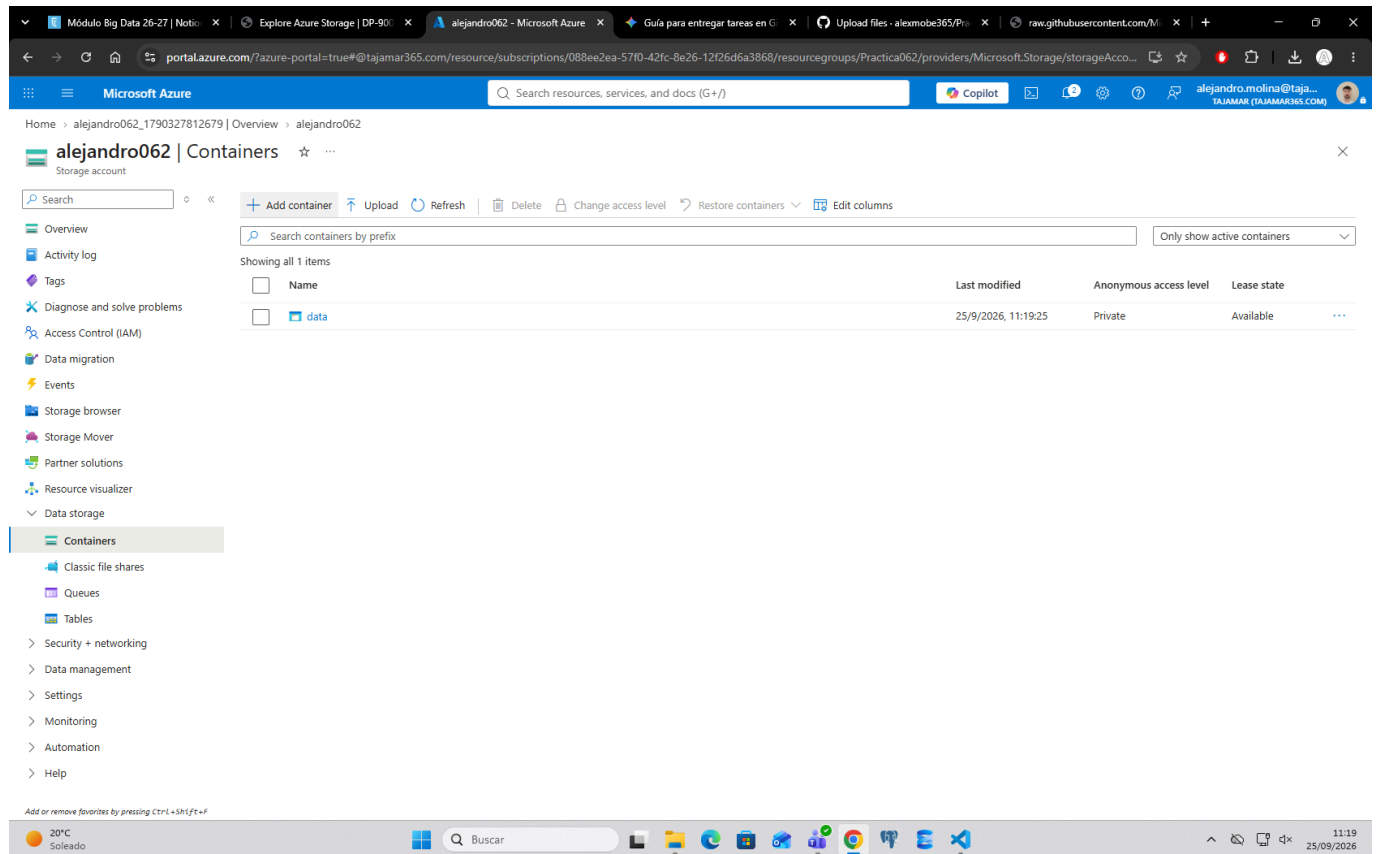

1.1. Creación del contenedor (ej. 'data')

The screenshot displays the Microsoft Azure portal interface. The top navigation bar shows the user is logged in as 'alejandro.molina@tajamar365.com'. The main content area is titled 'Storage browser' for the account 'alejandro062'. On the left, a sidebar lists various storage services, with 'Storage browser' selected. The central pane shows 'Blob containers' with a search bar and a table of existing containers. The table lists one container named 'data'.

Name	Last modified	Anonymous access level	Lease state
data	25/9/2026, 11:19:25	Private	Available

1.2. Archivo subido exitosamente al contenedor

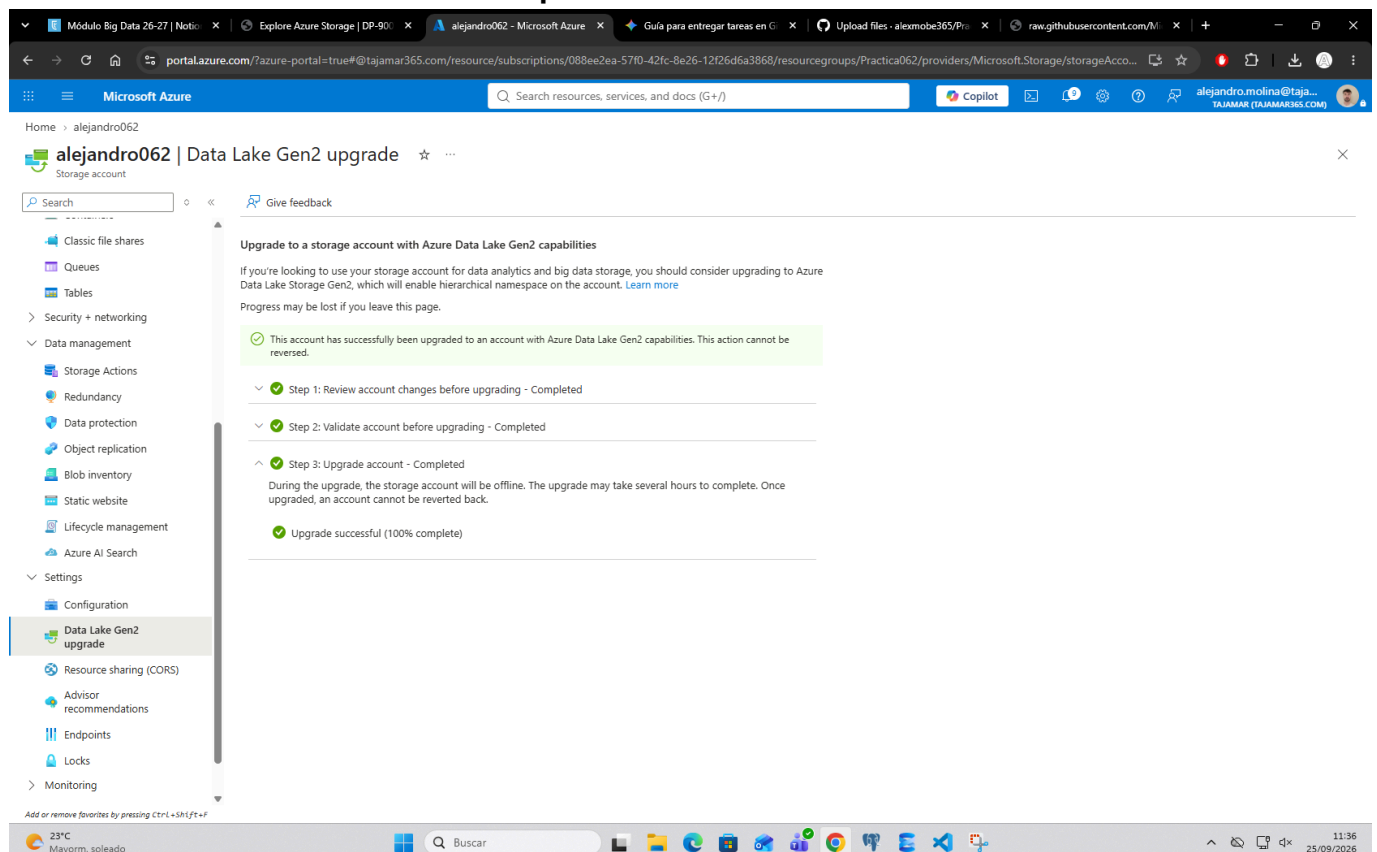

Microsoft Azure portal showing the 'Containers' page for storage account 'alejandro062'. The page displays a table with one item named 'data' uploaded on 25/9/2026 at 11:19:25. The table has columns for Name, Last modified, Anonymous access level, and Lease state. The 'data' item has an Anonymous access level of 'Private' and a Lease state of 'Available'.

Paso 2: Explorar Azure Data Lake Storage

Capturas del proceso de actualización a Gen2 y la navegación jerárquica.

2.1. Actualización a Data Lake Gen2 completada

Microsoft Azure portal showing the 'Data Lake Gen2 upgrade' page for storage account 'alejandro062'. The page displays a progress bar indicating the upgrade is successful (100% complete). The progress bar shows three steps: Step 1: Review account changes before upgrading - Completed, Step 2: Validate account before upgrading - Completed, and Step 3: Upgrade account - Completed. A message states: 'This account has successfully been upgraded to an account with Azure Data Lake Gen2 capabilities. This action cannot be reversed.' The page also includes a 'Give feedback' button and a 'Learn more' link.

2.2. Creación de directorio y archivo subido (Espacio de nombres jerárquico)

The screenshot shows the Microsoft Azure portal interface for the 'Storage browser' of the 'alejandro062' storage account. The left sidebar lists various services, with 'Storage browser' selected. The main area displays the 'data' blob container. A notification at the top right states 'Successfully uploaded blob(s)' and 'Successfully uploaded 1 blob(s)'. The table below shows the contents of the container:

Name	Last modified	Access tier	Blob type	Size	Lease state
product1.json	25/9/2026, 11:23:29	Hot (Inferred)	Block blob	323 B	Available
product2.json	25/9/2026, 11:42:55	Hot (Inferred)	Block blob	326 B	Available

Paso 3: Explorar Azure Files

Capturas de la creación de un recurso compartido de archivos (File Share).

3.1. Creación del recurso compartido (File share)

The screenshot shows the 'New classic file share' wizard in the Microsoft Azure portal. The 'Review + create' tab is selected. The 'Basics' section shows the following configuration:

- File share name: files
- Access Tier: TransactionOptimized
- Protocol: SMB

At the bottom, there are buttons for 'Create', '< Previous', 'Next >', and 'Download a template for automation'. A 'Give feedback' link is also present.
